Was thrown together late game and it worked ok, so I left it like that. Put it on P4 MC, set up with debilitate + heat riser + power charge + one buff of your choice, and you're gonna be taking 1/2 health off of the final boss in one turn at level 75. Worked wonders for me, and I hope it'll work wonders for someone else!

Comes with Demon's Stab and Swift Strike (For those times you need something more accurate), as well as Matarukaja. I've left him at base level in case people want to use him and keep some of his other skills.

It'll learn Salome's Kiss next, I'd probably switch it out with either Circle Recovery or Summon Demon.
